

Serial No. 10/824,363  
Amdt. dated August 4, 2006  
Reply to Office Action of May 8, 2006

Docket No. K-0634

**Amendments to the Drawings**

Replacement sheets for Figures 7A - 7C and a new sheet for Figure 5G have been submitted with this paper to overcome the drawing objections. New Figure 5G adds no new matter in that all of the features shown therein are disclosed, for example, at Paragraph [0047] of the specification.

Attachments:

- (1) Replacement Sheets for Figures 7A-7C
- (2) New Sheet for Figure 5G
- (3) Marked-up copies of Figures 7A-7C

## REMARKS

Claims 1-9 are pending. Claims 1-5 have been allowed and claims 2 and 6-8 have been amended to recite additional features of the invention. In addition, the specification and drawings have been amended to overcome the objections issued by the Examiner.

Reconsideration of the application is respectfully requested for the following reasons.

The following amendments were made to overcome the drawing objections:

- a) Figures 7A and 7B have been amended to include the legend "Prior Art."
- b) New Figure 5G has been added to show the features recited in claims 4 and 9. It is respectfully submitted that the addition of this figure adds no new matter as the features shown therein were disclosed, for example, in Paragraph [0047] of the specification as originally filed.
- c) Figure 7C has been amended to include the reference numerals mentioned in Paragraph [0051] of the specification. This paragraph has also been amended to reference other features shown in this figure.
- d) Paragraph [0046] was amended to reference "a" and "b" shown in Figure 6.

Applicants respectfully submit that these amendments are sufficient to overcome all of the objections to the drawings. Replacement sheets for Figures 7A-7C have been submitted with this paper and a new sheet has been submitted for Figure 5G, which adds no new matter.

Claims 6-9 were rejected under 35 USC § 103(a) for being obvious in view of an AAPA-Kanno combination. This rejection is traversed on grounds that claim 6 has been amended to recite "forming a counter strip on the indium-tin-oxide strip located in regions other than an emitting region, wherein the counter strip is in a grid form having a plurality of holes." Claim 6, therefore, has been amended to recite features similar to those which patentably distinguish claim 1 from the references of record. Accordingly, it is respectfully submitted that claim 6 and its dependent claims are allowable.
